Our Goals

The Informatik-Forum Stuttgart e. V. (infos) has provided substantial support to the Computer Science department at the University of Stuttgart for more than 20 years.

Our primary goal is to strengthen the position of Computer Science in the Stuttgart area, both within the scientific and business communities. We see infos as a liaison between the research community and industry, striving to establish relationships and enhancing the exchange of information between those communities.

We advocate a strong basic education in Computer Science in schools and promote broadly based study programs to further encourage young academics in Stuttgart and Baden-Württemberg. To do so, we use our wide network in both science and industry, taking advantage of our board of trustees with blue-ribbon members from academia and economy.

A variety of events provide ample opportunity to all alumni of Computer Science of the University of Stuttgart to establish new contacts or to stay in touch with existing ones.

Our Structure

The Informatik-Forum Stuttgart e.V. was founded on October 16, 1996, with the intention of promoting Computer Science and to popularize it beyond the bounds of the University. With almost 600 members, we are one of the largest support associations at the University of Stuttgart.

The association is run by a board that is elected in an annual general meeting. For issues of structure, finance, and further development, we can rely on the support by a board of trustees whose members are highly respected public figures and business representatives.

A selection of our activities

- Two job fairs a year with up to 55 exhibitors each, to promote the exchange between academia and industry.
- Regular lectures, colloquiums, and conferences on current topics in Computer Science
- Regular infos internships for students in collaboration with strong industrial partners
- Start-up funding of new Computer Science chairs at the University of Stuttgart
- Partial funding of the second Computer Science building
- Publication of the infos newspaper twice a year covering current developments in the Computer Science department at Stuttgart University
- Regular publication of special-topic booklets
- Support of and collaboration in organizing the commencement ceremony for the Computer Science programs
- Granting of awards for outstanding theses and dissertations
- Support of National scholarships (Deutschlandstipendien)
- Organization of scientific conferences
